Subject: Microsoft Anti-trust resolution comments

Hello,

I am disappointed that you did not go far enough in limiting Microsoft's monopoly powers with regards to bundling products with its Windows operating system. As Vice President of Information Technology for my company, I hate the fact that Microsoft has so much control over the computers and software that we purchase. As a consumer, I want choices. I don't want Microsoft to dictate to me how and when I use their products.

Sincerely,
Brian Clark
